Milestone XProtect™

Open Platform IP video software management

Powerful surveillance that´s easy to manage.

The XProtect™ Product Platform gives you true hardware and software independence and is unique in meeting all the hallmarks of a true Open Platform solution.

Milestone's Open Platform future proofs your investment by enabling you to integrate your current technology and future innovations.

milestone

The XProtect Advantage
comprehensive video management tools

Milestone provides a true open platform to video enable your business and increase the effectiveness of security teams in reducing risk and protecting people and assets.

Reliable and proven technology

Milestone's well-proven technology enables companies to build reliable and stable IP video solutions. The Milestone technology is proven in operation in more than 45,000 customer installations, so you know you can count on robust performance.

Scalable to meet future demands

As your surveillance requirements grow, so do the scalable XProtect solutions. Simply upgrade to a larger version or add more devices and servers. Moves, adds and changes are easy to do. This allows you to take advantage of the newest technology.

Hardware independence

Milestone software supports more than 500 different camera models, video decoders and selected DVR's from over 50 manufacturers. This gives you the widest selection so you can choose the right device for the job.
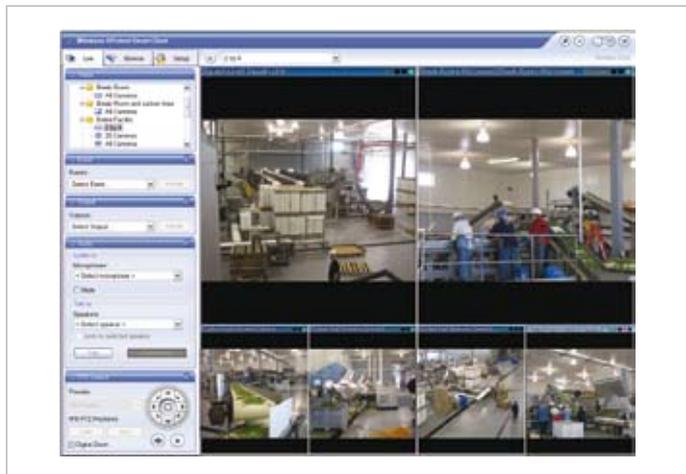

Open Platform for integration

The open platform and well-documented Application Programming Interface (API) offers the ability to build best-of-breed solutions and integrate with other systems. Interoperablity allows you to cost-effectively optimize your exact business need.

Live view and control via remote access

Milestone remote access empowers managers, security personnel and administrators with full control. Featuring an intuitive and easy-to-operate interface, the remote access provides both seamless live view and instant access to recorded video for fast searching, analysis and export of evidence.
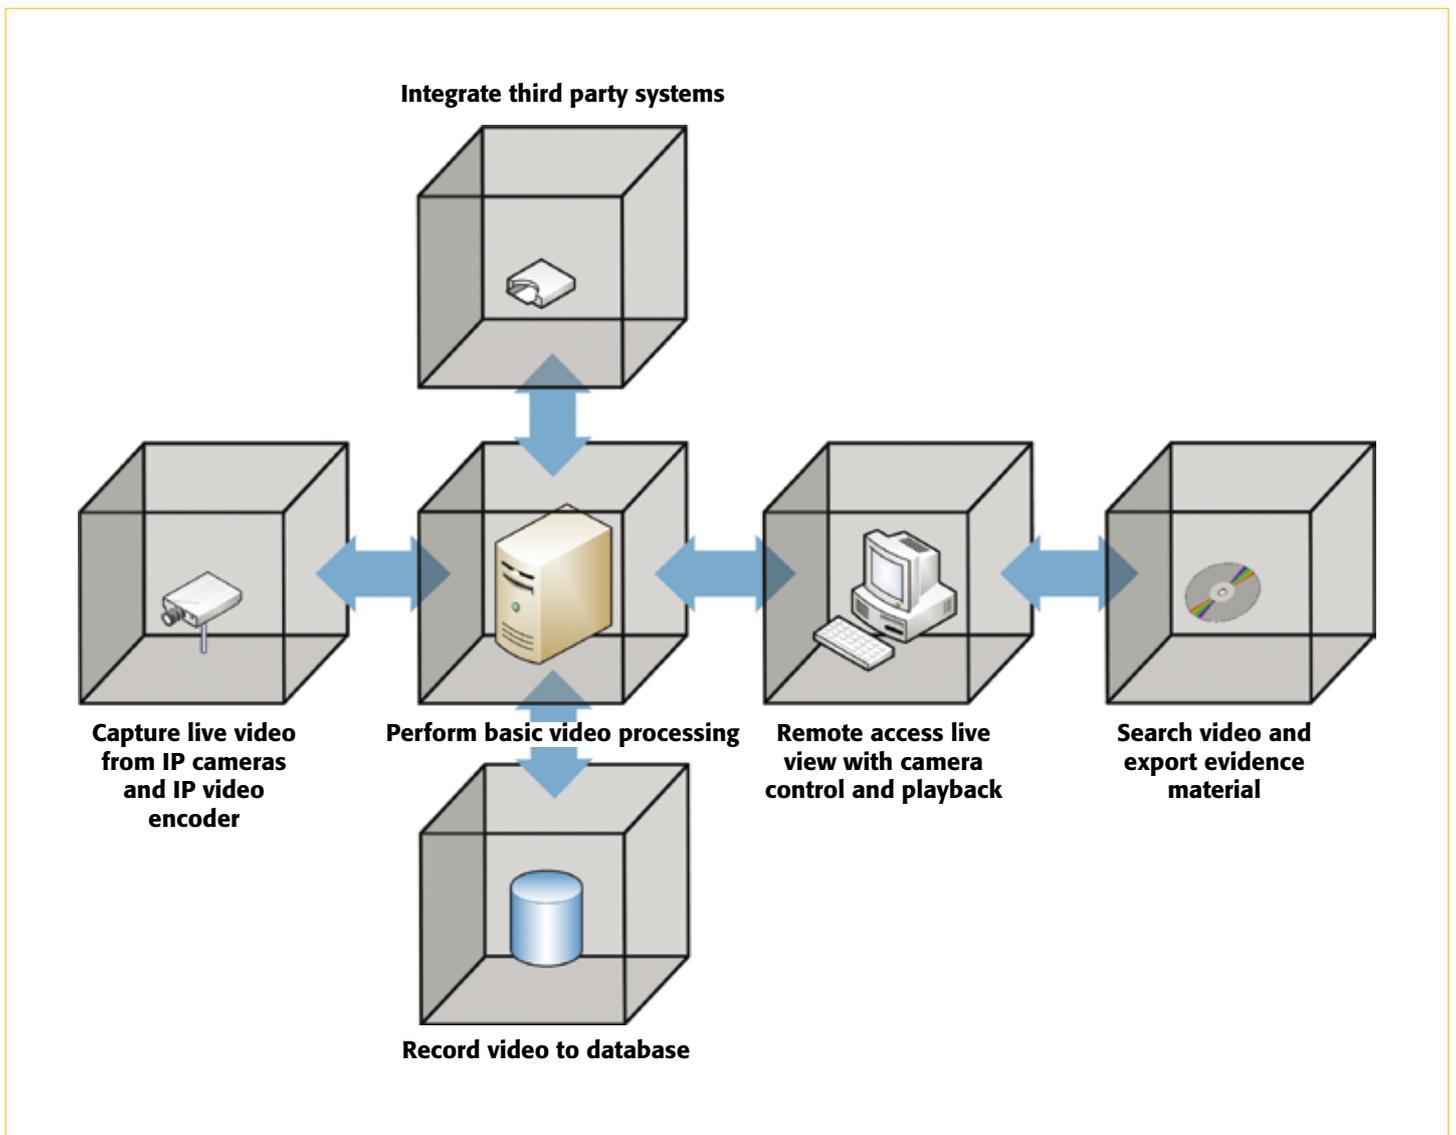

IP video surveillance provides full overview of large and widespread areas, reducing vandalism and crime, thus increasing public safety.

XProtect provides an overview of production facilities. Use video to ensure safety regulations are met and increase the value of your products and services.

The XProtect Open Platform

Milestone XProtect is Open Platform IP video management software that acts at the core of your surveillance, providing all the advanced functions and connecting all the elements in your solution.

Integrate third party systems

Capture live video from IP cameras and IP video encoder

Perform basic video processing

Remote access live view with camera control and playback

Search video and export evidence material

Record video to database

Easy to Manage: Powerful Features

Milestone's Open Platform future proofs your investment by enabling you to integrate future technology innovations even if they did not exist when you bought the solution.

XProtect Corporate

Premium IP video platform with central management of unlimited cameras, including full-featured remote access. The remarkably simplified central administration is tailored for very large multi-server, multi-site installations with thousands of cameras.

- Multi-server system supports unlimited devices
- Central management and administration
- Full-featured Access Client
- Innovative and flexible rules system
- Integration with Microsoft® Active Directory
- Software Development Kit (SDK) available
- Support for XProtect Transact and Central
- Licensing per server and per device channel

XProtect Enterprise

Comprehensive IP video management system running unlimited cameras, including full-featured remote access. Suitable for large multi-server installations with many cameras.

- Multi-server system supports unlimited devices
- Full-featured Access and Mobile clients
- Integration with Microsoft Active Directory
- Software Development Kit (SDK) available
- Support for XProtect Transact and Central
- Shared unlimited multi-server license and per device channel

XProtect Corporate simplifies the complexity of managing very large multi-location implementations.

A solution for every Need

From large multi-thousand camera to small 4-5 camera installations, the Open Platform is scalable for all applications.

XProtect Professional

Advanced single-server video management system running up to 64 cameras per server, including full-featured remote access. Designed for medium-sized installations with one server, this has a very attractive price/performance ratio.

◆ Single-server system supports up to 64 devices

◆ Full-featured Access and Mobile clients

◆ Integration with local Microsoft Windows account database

◆ Support for XProtect Transact

◆ Licensing per server includes 4, 9, 16, 25, 36, 50 or 64 channels

XProtect Basis+

Essential single-server video system managing up to 25 cameras per server, including full-featured remote access. Designed with all the basic features required for small implementations, it is an inexpensive entry-level product.

◆ Single-server system supports up to 25 devices

◆ Full-featured Access client

◆ Integration with local Microsoft Windows account database

◆ Support for XProtect Transact

◆ Licensing per server includes 4, 6, 9, 16 or 25 channels

Feature-rich, easy-to-use operation: the Smart Client gives you full control over your surveillance.

Add-on Products Increase value

## Build more intelligence into your video surveillance system with Milestone add-on solutions.

XProtect Transact and Retail

Reduce fraud and loss in retail
By managing the problems of fraud and theft head-on, the number one cause of financial loss in retail businesses can be reduced significantly.

XProtect Transact links video recordings with transaction data in POS and ATM systems, for resolving incidents and errors.

XProtect Retail fully integrates Point-of-Sale and Enterprise Resource Planning (ERP) systems with video. Combine data in any combination to easily search, view, analyze and export incidences. These implementations are project based.

XProtect Central

Central overview of XProtect sites
XProtect Central shows that your servers, devices and input/output units are up and running. In case of hardware or network connection failure, you are notified instantly and can initiate appropriate actions. XProtect Central integrates with all Milestone multi-server products.

XProtect Central provides overviews for visual verification of all locations; ideal for alarm centers, multi-sites or many buildings.

XProtect Transact handles loss prevention to save money on the bottom line.

The Value of Milestone's Solutions

Milestone XProtect IP video management software solutions optimize the performance of surveillance systems and provide all users with enhanced functionality and performance.

Administrators enjoy the benefit of time-saving features in the XProtect suite of products. The automated procedures and IT standards lessen the workload considerably for system and user administration and maintenance.

- **Automatic camera model detection** saves time when enrolling new cameras.

- **Scheduled archiving** optimizes video storage and disk space.

- **Built-in Video Motion Detection** (VMD) enables storage of relevant video only.

- **Flexible event rules** let you tailor the video operation to meet exact needs.

- **User authentication and authorization** tightly integrated with Microsoft operating systems ensure system consistency and a secure, single point of user administration.

Operators quickly master all the daily surveillance system operations, with such features as:

- **View live and playback** recorded video.

- **Smart search** through video and events, saving valuable time.

- **Intelligent Pan-Tilt-Zoom** (PTZ) provides full control of all perspectives.

- **Virtual matrix** empowers you to send any view anywhere on command.

- **Input/output event control** facilitates advanced, integrated, intelligent security systems.

- **Create and export evidence material** quickly and securely.

Milestone Systems
The Open Platform Company

Milestone Systems is the leading developer of open platform IP video management software. The XProtect™ solutions are easy to use, robust and proven in more than 45,000 customer installations. With support for the widest choice in network hardware and integration with other systems, XProtect provides best-of-breed solutions to "video enable" organizations - reducing costs, optimizing processes, protecting people and assets. Milestone software is sold through authorized partners in 90 countries.
